INTRODUCTION:

This position serves as an Assistant Dispatch Center Manager located in an interagency dispatch center. Assists the Center Manager in the oversight of all dispatch center operations. In the absence of the Center Manager, the incumbent becomes Acting Center Manager.

The area involved encompasses some combination of federal, state, tribal, and private lands within the dispatch center's area of influence and supports more than one unit. At least one of the units has a high program complexity. The center is responsible primarily for wildland fire preparedness and suppression support activities, but may support all-risk incidents as needed or directed.

Beginning October 1, 2010, the National Wildfire Coordinating Group (NWCG) incident management qualifications and additional required training specified in the Interagency Fire Program Management (IFPM) Qualifications Standards and Guide apply to all grade levels of this position description.

Prior wildland firefighting experience on the fireline is a mandatory requirement.

This is a Testing Designated Position (TDP) under the Department of the Interior Drug-Free Workplace Program.

DUTIES:

Operations/Mobilization (50%)

Establishes priorities, allocates resources, and supervises the mobilization, demobilization, and reassignment of wildland fire suppression resources necessary to support current and anticipated initial attack and logistical support emergency operations within the local, geographic and national area. Ensures that contingency plans are prepared to respond to emergency situations.

Manages incident and administrative intelligence (e.g., fuels, weather, resource status, and reporting) to ensure the effectiveness and efficiency of dispatch center decisions.

Provides supervision to and coordinates the expanded dispatch organization. Plans work objectives on a daily or project basis and makes adjustments to meet priorities. Adjusts shift lengths, staffing levels and work assignments to changes in workload.

Supports interagency resource management activities. For example, coordinates aircraft flight following, law enforcement assistance, search and rescue coordination and all other administrative/all- risk activities according to policies.

Analyzes inventories and availability of all- risk resources and directs the ordering and procurement necessary to meet area-wide incident management objectives.

DOI113

Coordinates and assures communications channels (telephones, e- mail, radios and frequencies) with field resources are operable and afford a safe environment for employees in the office and field.

Ensures that safe and efficient practices are followed at the center and during all movements of personnel, equipment and aircraft.

Preparedness (15%)

Assures on-going emergency response preparedness.

Develops, implements, and updates numerous documents (e.g., Dispatch Operations Guide, Expanded Dispatch Plans, Mobilization Plans, Emergency Rental Agreements, Memoranda of Understanding, and Cooperative Agreements).

Assists with the administration, integration, and oversight of the use of telecommunication equipment, computer based applications, and other related communications equipment. Recommends modifications to existing systems and tests new applications when necessary.

Develops or modifies dispatcher related training and serves as subject matter expert during training course development (e.g., initial attack dispatch, aircraft, intelligence, expanded dispatch). Evaluates training for effectiveness and delivery method. May serve as lead or unit instructor.

Compiles and disseminates incident and resource statistical information to participating agencies, cooperators, the public, and the media on an as needed and annual basis.

Leader (35%)

Provides technical direction to employees on day-to-day operations.

Plans work to be accomplished, sets and adjusts short-term priorities, and prepares schedules for completion of work. Assigns work based on priorities, selective consideration of the difficulty and requirements of assignments, and the capabilities of employees. Provides input on performance standards and work performance. Gives advice, counsel, and instruction to employees on both work and administrative matters. Identifies training needs. Finds ways to improve production or increase the quality of work.

The incumbent cooperates in carrying out affirmative action and career targeting plans at the center as established by agency policies.

FACTORS

1. Knowledge Required by the Position

(Level 1-6, 950 points)

Knowledge of the concepts, principles and practices of incident management and support for the full range of logistics/fire suppression techniques in order to, (1) understand the potential threat of fire to the natural resources, private property and the resource values within the geographic area; (2) assimilate this data, set priorities and allocate resources for the protection of those resources and property; (3) prepare for and assess short or long range functional resource needs based upon fire severity.

Technical knowledge of fire suppression and dispatching methods, practices, and procedures. Prior wildland fire fighting experience on the fire line is mandatory in order to coordinate suppression, preparedness, prevention, and prescribed fire activities.

Technical knowledge of wildland fire behavior, weather, effects, and logistics information systems.

Comprehensive knowledge of 1) interagency (federal, state, and local cooperators) fire preparedness and suppression management policies, practices and procedures; 2) the Incident Command System; 3) the mobilization and demobilization of resources in a multi-jurisdictional environment; 4) tactical and administrative aircraft capabilities and limitations including the pilot and aircraft certification programs, aircraft contracting, and air operations safety; 5) fiscal procedures and diverse Federal and State land management policies and procedures to ensure the most efficient and cost effective management of resources.

Knowledge of disaster preparedness and management operations, including logistical support, incident management, mobilization, interagency coordination, and resource allocation.

Ability to apply sound personnel management skills to include coaching, training, and motivation.

Skill in utilizing computer hardware and specialized applications specific to initial attack dispatching, expanded dispatch, fire suppression, prescribed fire, aviation management and administration.

Ability to effectively communicate orally and in writing with a wide variety of Federal, State and local agencies to negotiate, reach concurrence, and maintain an effective working relationship with cooperators.

2. Supervisory Controls

(Level 2-3, 275 points)

Incumbent works independently under the supervision of the Dispatch Center Manager with delegated authority to act for the agency administrators in fire and emergency situations. The Dispatch Center Manager provides overall objectives, goals, and priorities.

Range/Forestry Technician (Dispatch), GS-455/462-9 Assistant Dispatch Center Manager **DOI113**

The incumbent is responsible for implementing specific action plans, resolving problems and conflicts as they arise, and coordinating work with other staff members. Work that may involve a new direction in operating practices, a break with long standing practice, or controversy is discussed and agreed upon with the Dispatch Center Manager.

Completed work is reviewed for adequacy, technical soundness, and accomplishment of specified objectives. The nature of the work requires the incumbent to commit resources to meet emergency situations. Such commitments can only be reviewed after the fact.

3. Guidelines

(Level 3-3, 275 points)

Guidelines are found in interagency manuals and agency specific manuals, handbooks, directives and policy statements. Many guidelines provide only limited general directions and require the development of standard procedures to implement their intent.

The incumbent has broad latitude for independent action due to the wide range of variables under which the work is accomplished. Each incident is different, and the requirements for safe, timely, cost effective and legal operations given the number and variety of situations encountered in carrying out assignments, requires the incumbent to adapt or extend guidelines or choose from alternative procedures.

4. Complexity

(Level 4-3, 150 points)

The center coordinates with multiple agencies (e.g., Federal, State, Tribal, and local) the movement of tactical and logistical resources in support of emergency incidents. The incumbent directs coordination efforts for multiple large incidents and new ignitions possibly occurring simultaneously in a variety of fuel types within a geographic area.

The employee analyzes specific situations encountered and selects the most appropriate course of action.

Threats to life, property, and natural resources are commonplace. The incumbent's decision-making is complicated by the number, size and locations of incidents requiring support, time constraints, priority, risks, availability of resources, and the expenditure of public funds.

5. Scope and Effect

(Level 5-3, 150 points)

Assists the Center Manager in the oversight of all dispatch center operations. The center's area of influence encompasses a combination of federal, state, tribal, and private lands. The center supports more than one unit. At least one of the units has a high program complexity.

The purpose of the work is the mobilization of resources to incidents threatening life, property, and natural resources. The center provides logistical support to resources assigned to incidents.

Decisions protect human lives, property, and multiple resource values. These decisions often result in the expenditure of large sums of public funds and may have economic, social, political

and environmental impacts. The actions of the incumbent affect the safe and cost-effective accomplishments of interagency aviation and fire management support programs throughout the center's area of influence.

6. Personal Contacts

(Level 6-3, 60 points)

Personal contacts are made with all levels of cooperating land management and emergency support agencies. Primary contacts are with fire suppression personnel, resource specialists and other unit coordinators. Other personal contacts are with national and local news media, contractors, private landowners, political officials, and the general public.

7. Purpose of Contacts

(Level 7-3, 120 points)

Contacts are for the discussion of critical emergency services and fire management programs with Federal, State, and local organizations which are often complicated by mixed ownership and complex management responsibilities. This requires tact and persuasion to resolve operating problems with organizations that often have conflicting viewpoints on use of their emergency resources.

Public contacts are designed to inform the parties involved of current land management activities and the efforts being made to protect lives, property, and multiple resource values. Media contacts are designed to inform the general public of the current or predicted fire or emergency situations.

8. Physical Demands

(Level 8-1, 5 points)

The work involves long hours of sitting, intense concentration, and working at peak proficiency/intensity levels with irregular breaks and mealtimes. The duties of this position create a highly stressful environment during peak activity, requiring the ability to keep calm in emergency situations. Must be able to cope with the pressure of meeting timeframes and changing priorities. Mental concentration and accuracy are required.

Travel associated with field visits and other administrative travel may be required.

9. Work Environment

(Level 9-1, 5 points)

Work is performed primarily in an office setting. During peak activity, increased radio traffic, numerous ringing phones, and conversations result in high noise levels, which require a high level of concentration to perform duties. This creates a high stress work environment.

1990 points, GS-9 (1855 - 2100)
